

green care REMOTE

Anytime from anyplace

Laundry | Ware washing | Dispensing

GREEN CARE REMOTE – ANYTIME ANYPLACE...

Green Care Remote is a dosing management system that lets your business monitor critical process indicators and product consumption parameters at any time without help from technical staff. This Cloud Computing solution for sustainable detergent dispensing allows controlling, consulting, modification and storage of information about product consumption and working processes in real time.

Features:

Monitor & report working activity anytime from anywhere

Additional and faster troubleshooting to minimize downtime

Real-time consumption reports and transparent analysis of working processes

Reports can be integrated in quality management systems or used for external audit purposes

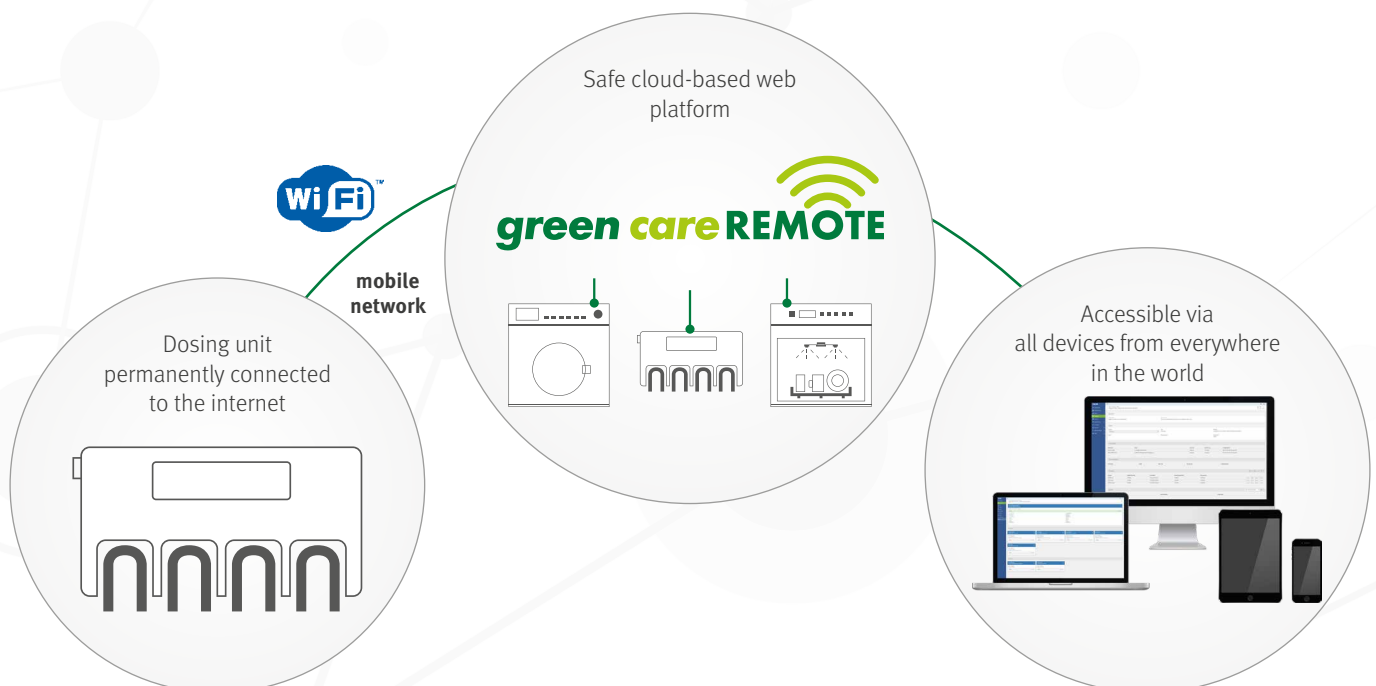

Improved efficiency of Green Care Professional products and utilized resources

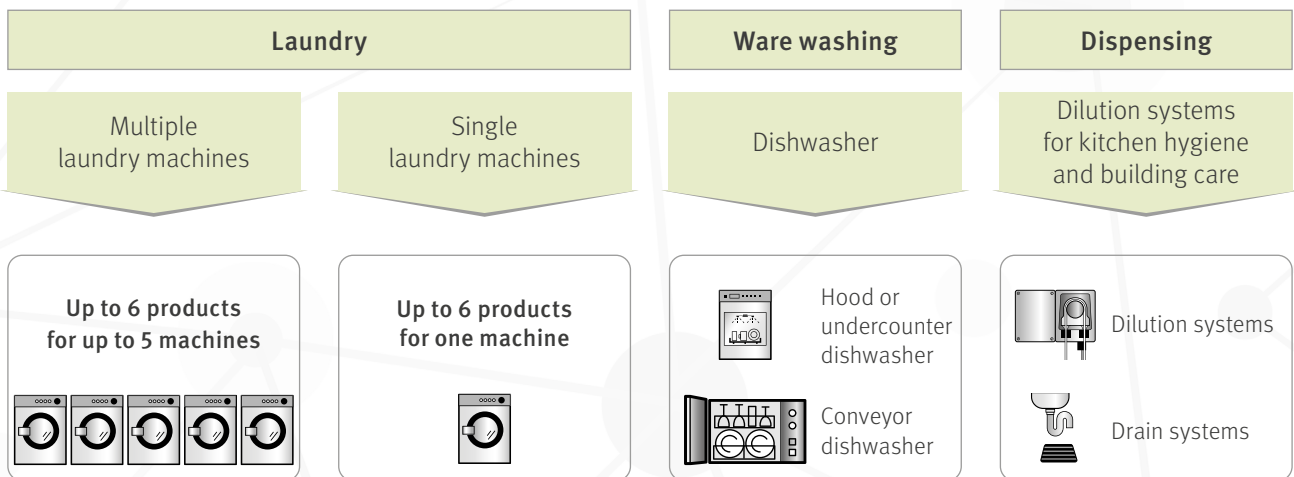

Optimized product accounting and logistics

How it works:

Application fields:

Management platform:

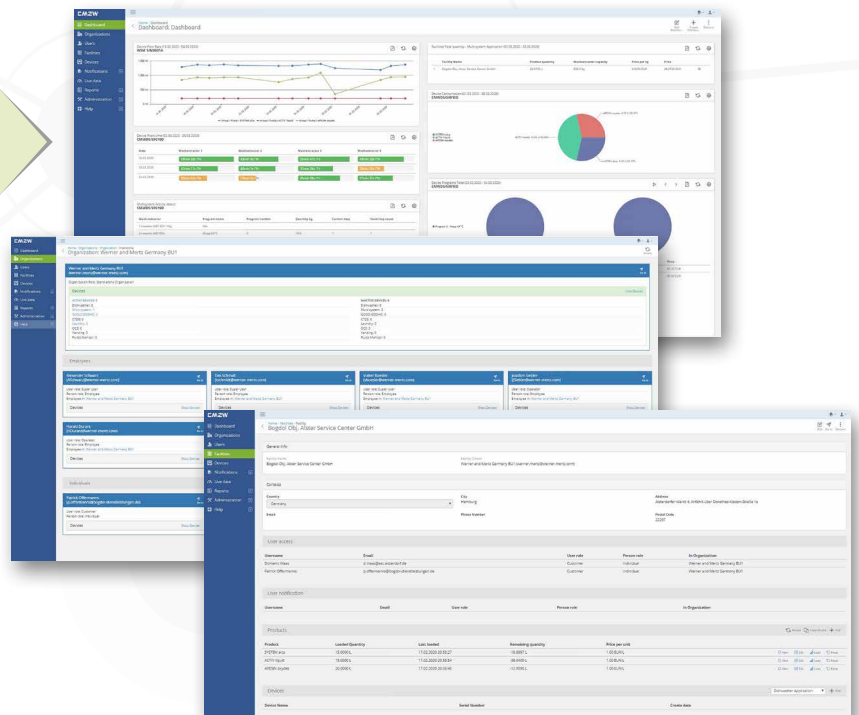

The Remote Dosing Management Platform provides comprehensive information about your critical process indicators and consumption parameters.

- Location & responsible service partners
- Detailed reporting
- Consumption monitoring
- Proof of product dosing
- Monitor flow rates and limit disruptions
- Alerts and errors via email

✓ Option to create customized dashboards and widgets

✓ Detailed real-time reporting instruments

✓ Intervention & preventive alerts
