

Your strong partner in the health care system

Together for a sustainable circular future

Challenging times for the health care system

The people who take on these tasks deserve our respect!

The healthcare sector is currently facing greater challenges than ever before, not least due to the far-reaching impacts of the Covid pandemic. Time and staff shortages, huge workloads, rising costs and shortages of raw materials are all constant factors in the hectic day-to-day running of a clinic. In the midst of these challenges, compassion and care for patients must remain a priority.

Social influences

- High staff workloads and overloaded intensive care units
- High capacity utilisation: Ageing society and high care rate in old age
- Greater patient needs

Economic challenges

- Inflation and rising costs
- Skills shortage and high cleaning staff turnover
- Rising price pressure, partly due to the greater number of privatised hospitals
- Time constraints, such as due to staff shortages
- Increase in hygiene measures

Political challenges

- Guaranteed medical care in rural areas
- Vacant positions in the medical service
- Political and societal calls for sustainability
- Digitalisation (increasing the efficiency of clinics)
- Pandemic-related laws and regulations

Ecological awareness

- Greater patient expectations regarding the environment and sustainability
- Consequences of climate change, such as natural disasters
- Scarcity of resources

A strong partnership

We help you meet the challenges of everyday clinic life, big or small.

Seamless hygiene concept

Our efficient hygiene and disinfection concepts guarantee the required standard of clinical hygiene. Our products are easy and safe to handle and have non-toxic formulations, ensuring safety for people and the environment.

Focus on humanity

We care about you and your patients! We build a genuine partnership with you and are there for you with personal contacts on site.

Speed and flexibility

Cleaning in clinics has to be quick, efficient and reliable. Thanks to the effective cleaning power and the intuitive and convenient handling of our ready-to-use cleaning agents, you save time and reduce walking distances.

Outstanding value for money

Our products offer you lower costs per application compared with competing products. Our efficient dosing systems save costs.

Competent cleaning staff

Our Green Care Academy, an easy-to-understand e-learning tool, helps you train your cleaning staff.

Complete and sustainable cleaning

Demand for sustainability has increased significantly. With our Green Care Professional brand, we provide high-performance and sustainable cleaning solutions. What's more, our products will look good in your sustainability report.

Our areas of application

How we support you

A sustainable circular future with Green Care Professional

Formulation

In development and production, we consistently use renewable energy technology and raw materials. We continuously reduce by-products, pollutants and residues in our formulas. We also pay attention to the biological degradability of materials and exclude raw materials with negative environmental impact in compliance with EU Ecolabel requirements.

As our formulas contain neither hazardous nor prohibited materials, they are harmless for humans and the environment.

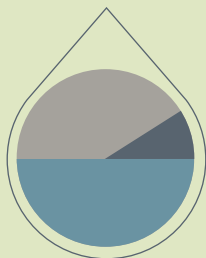

Packaging

In order to do without virgin plastic made from crude oil and to conserve our fossil resources, we rely on recyclate from the Yellow Bag. We refrain from using PS (polystyrene) and PVC for our packaging components.

The recyclate share in our bottles is 100% and our bottles are completely recyclable. After their disposal, they can be returned safely to the material cycle.

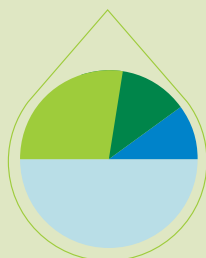

Conventional product formulas

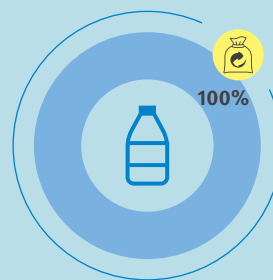

- Crude oil-based surfactants
- Dyes
Fragrances
- Water

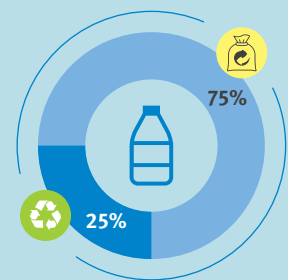

Green Care Professional formulas

- Plant-based surfactants (tropical crops)
- Plant-based surfactants (European crops)
- Food dyes
- Water from our own well

HDPE bottles

PET bottles

In the long term we will use 100% recyclate from the Yellow Bag for our PET bottles. Until a complete switch is possible, we supplement the material with recyclate obtained from deposit bottles.

Practised circular economy

Formulation

We use plant-based surfactants.
The formulations are free from harmful ingredients.

Packaging

Waste is a resource for us:
Almost all of our packaging is made
from recyclable and recycled plastic.

Biological
cycle

Technical
cycle

Recycling

Empty packaging can be returned to the
recycling cycle via household collection
(such as the Yellow Bag).

Compost

Our cleaning chemicals
are biodegradable

Plant-based raw materials

We use renewable,
plant-based raw materials.

Technical raw materials (recyclate)

Sorting and processing turns recyclate into new,
high-quality plastic packaging.

Make sustainable cleaning your added value!

Cleaning power through quality

Quality “made in Germany”:
High-performance and efficient cleaning.

Safe for people and the environment

We use harmless materials that can be returned to the cycle.

Recyclable products

We stand for a circular economy along the entire value chain.

Sustainable profitability

Our smart cleaning concepts enable precise and economical dosing.

200+
 Product certifications

Our success: World record
 More than 824 million PET bottles made from recycle have so far been put into circulation by companies in the Werner & Mertz Group. (as of: March 2024)

All-round service

Based on unique expertise

1

Top advice

Our well-trained consultants put your cleaning services to the test and help you improve them.

- Property folders provide comprehensive information about your property, processes and the products used.
- Application engineers provide advice on site

2

Tailored concepts

Whether recommendations, cleaning or outbreak plans: We use our expertise to improve your services and solve your technical application problems.

3

Technical support

Not quite sure how to use a product?

- Provision of dosing technology
- Dedicated technical team to rectify dosing technology faults

4

Hygiene aids

We offer all-round services for setting up and maintaining first-class hygiene standards.

- On-site advice from trained disinfection experts
- Testing and documentation as part of hygiene audits
- Microbiological tests

Specific services.

We are happy to provide you with all the info you need on our range of services or details about specific services: info@tana.at

5

Ecological footprint as a competitive advantage

Sustainability is becoming increasingly important. However, a competitive advantage can only be secured if this can be convincingly communicated. We help you do this: The Green Care Performance Calculator allows you to calculate your ecological footprint and even have it certified. You can use the certificate for your sustainability report!

6

green care PROFESSIONAL ACADEMY

Specialist knowledge, effective training
Doing a great job with specialist knowledge: We offer all-round services for setting up and maintaining first-class hygiene standards.

Live training courses

Webinars

NEW: E-Learning

7

Joint marketing

We support your sustainability communication with tailored marketing materials. For example:

Certificate in the entrance/waiting area

Which system satisfies your requirements?

Ready4U

Speed

Our spray bottles for safe and fast application without measuring.

Concentrate + Dosing

Price / performance ratio

High-performance concentrate and simple dosing options.

Switch

Reduce + Reuse + Recycle

Ultra-concentrated formulations in bottle with dosing cap and refill pouch.

Kliks

Safety

Our compact Kliks cleaning system is intuitive and safe.

QUICK & EASY

Mobility

Precise dosing, suitable for mobile use, clever packaging design.

Clinical cleanliness

thanks to the highest standards of hygiene

Hygiene requirements are particularly high in the health care system. To meet this special challenge, the highest standards of cleaning, sterilisation and disinfection must be maintained, as this is the only way to ensure a germ-free environment. We offer efficient cleaning solutions in all hygiene areas:

1

Hygiene area I

Examples: Operating theatres, delivery rooms, intensive care units

- Disinfection of surfaces at least once a day
- Basic technical training required for cleaning
- Triple protective clothing and gloves
- Keep functional paths clear and observe the five-colour system
- Hand disinfection after cleaning is mandatory

2

Hygiene area II

Examples: Internal medicine, endoscopy

- Moderate risk of infection
- Double protective clothing
- Hand disinfection after every change of area

3

Hygiene area III

Examples: Administration rooms, entrance area, staircase

- No mandatory surface disinfection
- Cleaning cycle can be defined individually
