

**MAKE SUSTAINABLE CLEANING
YOUR ADDED VALUE**

„A credible eco product can come only from a company that consistently pursues sustainability in everything it does, guided by ecological awareness, economic foresight and social responsibility every single day.“

Reinhard Schneider,
CEO and owner of Werner & Mertz

Content and structure

Our company & Green Care Professional **4**

In our first chapter you'll read all about our family-run company, our values and the brand Green Care Professional. Learn more about our sustainability philosophy and pioneering role in the cleaning industry and our innovative concepts.

Application Areas:

Building Care **22**

Sanitary Cleaning **32**

Kitchen Hygiene **36**

Laundry Hygiene **44**

Personal Care **49**

Tana-Chemie GmbH
Werner & Mertz Group

Pioneer for more than 50 years:

Tana-Chemie – A company with a vision

For more than 150 years, the family-owned Werner & Mertz has been successful in the market as an umbrella brand and European forerunner in innovations for the cleaning industry. In 1971 Tana-Chemie was set up with offerings tailored to professional cleaning services. Our established brands Green Care Professional and Tana Profes-

sional, supported by highly qualified and motivated employees, stand for the entire company's unwavering commitment to sustainability. We are driven by our desire to make a sustainable lifestyle attainable for the majority even beyond the boundaries of our brand.

1971

Founding of Tana-Chemie GmbH

1989

Launch of the Green Care brand

2003

EMAS-certified production site in Mainz, Germany. Followed by Hallein, Austria in 2005.

2005

First EU Ecolabel certification

Better across the industry:

Wherever people come together, our cleaning products are put to use.

Together we are on the way to becoming the European market and innovation leader in professional specialized care. In our sector we will succeed with exemplary ecological products and concepts designed and developed for the circular economy. Based on our many years of experience, we provide our customers with comprehensive, customized and integrally sustainable hygiene solutions that contribute to their success.

Some of our major sectors:

- Public institutions
- Offices and commercial space
- Healthcare facilities
- Hotels, cafés and restaurants
- Industry
- Transportation and traffic
- Sanitary facilities and swimming pools
- Recreational facilities

2013
First Cradle-to-Cradle® Gold certification for a complete range of cleaning products

2014
First bottle of 100% recycle

2018
Release of the Green Care Performance Calculator

2022
Our Company wins EcoVadis Platinum Medal for the second time

The one-way street must be history

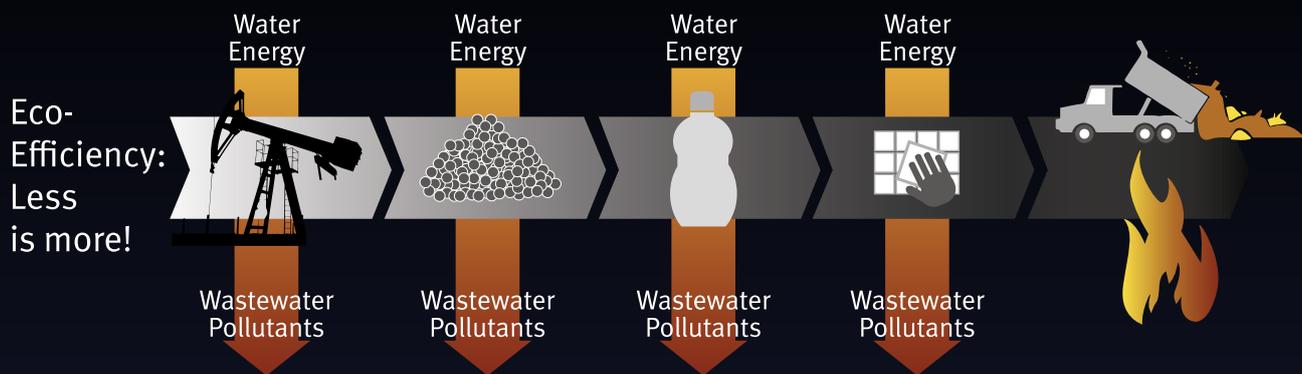

The lie of climate neutrality

**We cannot buy a way out of the climate crisis
with carbon offsets.**

Cradle to Grave: The materials flow with no consideration given to long-term resource conservation from the source to the landfill

No consideration for long-term conservation of resources
"One-way design": Take – Make – Waste

Are we digging our own grave?

Rainforests on fire, plastic waste on land and sea, climate change and species extinction are some of the world's current problems. The scientific framework of planetary boundaries describes nine environmental systems that interact with each other and affect the stability of Earth. Six of the nine boundaries have already been crossed. How did this turning point come about? To answer that question, we have to look at the currently predominant economic system—the one-way street—that is leading us into a dead end.

Take – Make – Waste

The material flow design still used today for most products is referred to as "cradle to grave". Its focus is on the product's usage phase. "Cradle to Grave" ignores the origin and the ultimate fate of a product. The environmental impact during production is neglected too. Nevertheless, many companies have found a dubious way out of the dead end in the climate-damaging one-way street. Carbon offsetting gives them the chance to disguise the real environmental impact of their products.

All signs point to change

At Green Care Professional we are convinced that first and foremost, companies have to reduce their CO₂ emissions and communicate that clearly and comprehensibly. Buying a way out through carbon offsetting alone won't change a thing. The time has come to bring about the ecological transformation at an industrial level.

How can we manage the transformation without giving up too much?

Simply turn the page.

The future belongs to circular economy

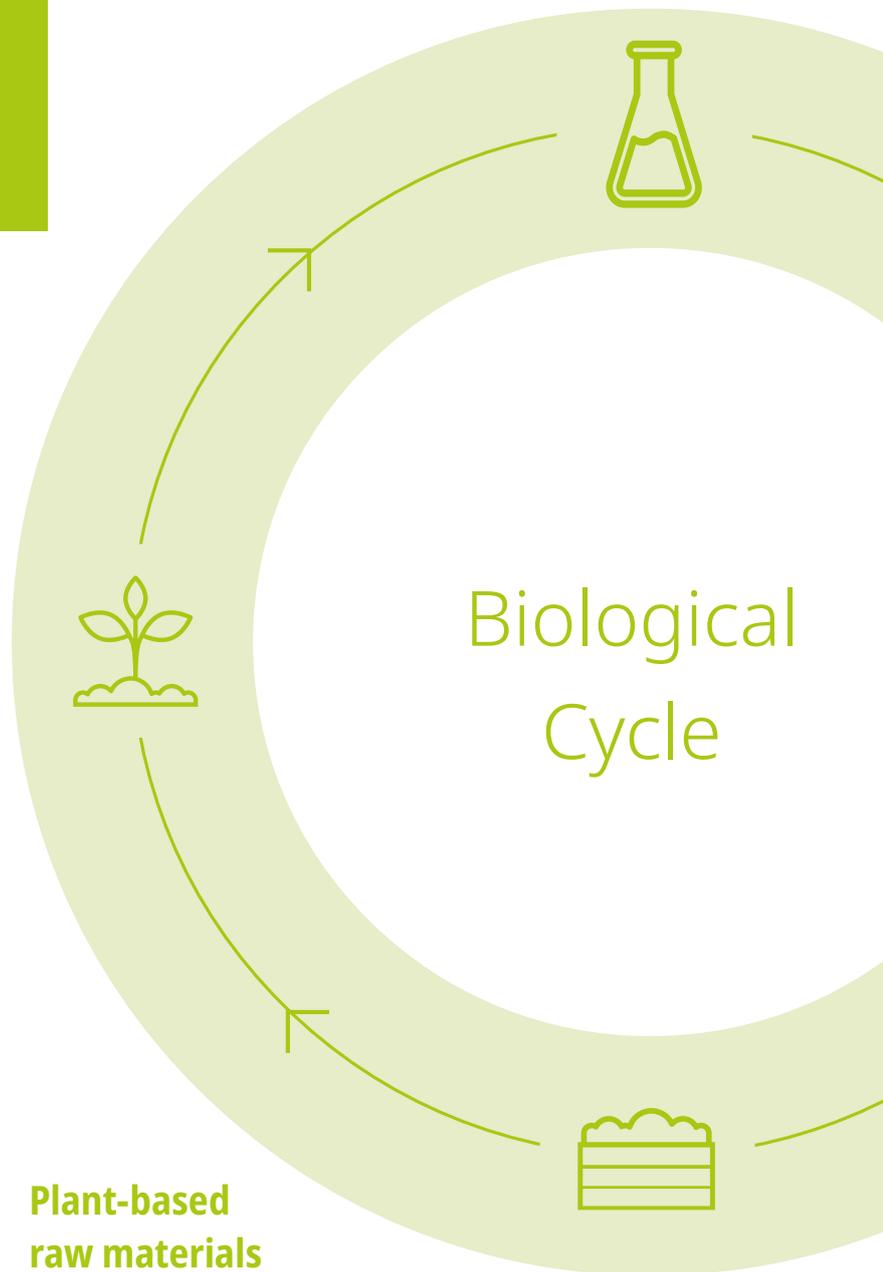

Sustainability has taken on a much bigger role. The one-dimensional Cradle to Grave principle, however, is still applied and supplemented merely by a reduction in the use of raw materials and resources. The issue: efficiency is improved, but no effectiveness is achieved.

No room for compromise in a true circular economy

In the circular economy according to the Cradle to Cradle® principle, how it is practised holistically with our Green Care Professional brand, the raw materials can be reused and pollutants are thus prevented from getting into the environment. The origin and fate of ingredients are kept in closed cycles, i.e., cleaning chemicals in the biological cycle and packaging in the technical cycle.

Formulas

We use plant-based surfactants in our sustainable formulas. They contain no critical ingredients or allergens.

Plant-based raw materials

We use renewable plant-based raw materials.

Compost

Our cleaning chemicals are biologically degradable.

Packaging

We see waste as a resource:
Almost all of our packaging is made
of recyclable and recycled waste.

Recycling

Through disposal via the European household collection (the Yellow Bag), empty packaging is once again returned to the closed loop of recyclable materials.

Technical raw materials (recyclate)

Recyclate is generated by the sorting and processing of plastic waste and then used to make new, high-quality plastic packaging.

Our Products

Our development guidelines follow Nature's example

Our development guidelines, which form the basis for our entire Green Care portfolio, follow the Cradle to Cradle® Principle. Ever since our brand was established, we have worked at optimizing our technical and biological recycling in order to make our formulas and packaging even more sustainable.

Green Care Professional – symbiosis of biology and technology:

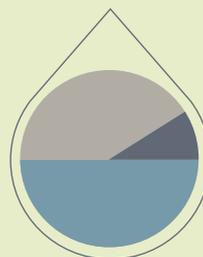

- **Strong cleaning power**
- **Excellent price/performance ratio**
- **Safe for humans and nature**

| Formulas

In development and production, we consistently use renewable energy technology and raw materials. We continuously reduce by-products, pollutants and residues in our formulas. We also pay attention to the biological degradability of materials and exclude raw materials with negative environmental impact in compliance with EU Ecolabel requirements.

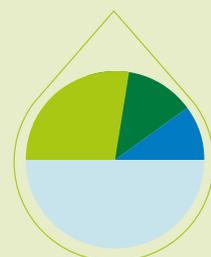

As our formulas contain neither hazardous nor prohibited materials, they are harmless for humans and the environment.

Conventional product formulas

 Crude oil-based surfactants
 Dyes
Fragrances
 Water

Green Care Professional formulas

 Plant-based surfactants (tropical crops)
 Plant-based surfactants (European crops)
 Food dyes
 Water from our own well

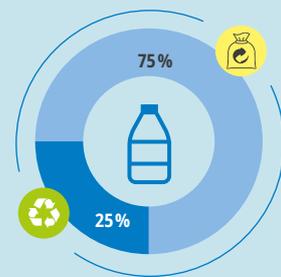

| Packaging

In order to do without virgin plastic made from crude oil and to conserve our fossil resources, we rely on recyclate from the household waste collection (Yellow Bag). We refrain from using PS (polystyrene) and PVC for our packaging components.

The recyclate share in our bottles is 100 % and our bottles are completely recyclable. After their disposal, they can be returned safely to the material cycle.

HDPE bottles

PET bottles

In the long term we will use 100% recyclate from the Yellow Bag for our PET bottles. Until a complete switch is possible, we supplement the material with recyclate obtained from deposit bottles.

Yellow Bag
Yellow Bin

PET deposit bottle
collection

Our development guideline

Safe and fair for humans and the environment

The Green Care Professional development guidelines contribute to achieving several Sustainable Development Goals (SDGs) and support the European Green Deal.

Material health & ecology

With the Type 1 Ecolabel, Green Care Professional can verify that the exclusion of toxic ingredients makes its formulations harmless to human life and the environment. Only harmless fragrances and dyes are used in accordance with Ecolabel criteria. Animal-origin ingredients, PFAS and synthetic polymers to avoid microplastic are excluded from Green Care Professional formulations. The packaging does without phosphates and PVC. Our use of renewable energies, in-house production of electricity from wind and solar power and sustainable production in accordance with ISO 14001 and 50001 at our EMAS-certified European sites with in-house water treatment facilities distinguish us as sustainability pioneers.

Circularity

Formulation

Origin: We use renewable plant-based raw materials instead of fossil sources and regenerative, degradable solvents with low limits. We promote the use of surfactants of European origin to support native species diversity.

Remaining: The goal is the reduction of by-products, contamination and residue, plus rapid, high biological degradability of organic materials.

Packaging

Origin: Avoidance of fossil resources through the use of Post-Consumer Recyclate from household waste collections like the Yellow Bag in bottles and caps.

Remaining: Design for Recycling of packaging to allow mechanical recycling without loss of quality (upcycling).

Social fairness

Our suppliers' code of conduct for the entire value chain ensures integrity, honesty, respect for human dignity and responsible handling of our resources. Production takes place in Germany and Austria. We assume responsibility for our customers through the full declaration of all our ingredients and our own customer training in the safe and proper handling of cleaning agents.

Economy

Sustainable procurement with Green Care Professional is economical, thanks to low cost per use, although they are sustainable. The recyclable packaging saves money on disposal. Intelligent, efficient dosing technology and ultra-concentrated formulations increase our customers' economic efficiency. The broad range of CLP-free products also reduces personnel training expenses.

Performance

The combination of top cleaning performance and sustainability does not require doing without anything found in conventional cleaning agents. Within the scope of Ecolabel certification, performance has been verified by marketing testing or performance checks by external testing institutions. Our intelligent dosing systems strengthen the efficient use of our cleaning products.

Outstanding Work for the Environment

Certificates: Proof of our progress

Our Green Care Professional portfolio offers a broad assortment of certified products. For all areas of application we have products that have earned at least one certification. This fact distinguishes us from other manufacturers and makes clear that genuine sustainability has to be practiced in the entire company if it is to be credible. We are a pioneer in the industry with the most Cradle to Cradle® certified products and are proud that we have proof of the recyclability of our formulas and our packaging.

At our production sites in Mainz and Hallein, we implement the highest quality and environmental standards and see them reflected in our certifications.

Production & Supply Chain

Holistic sustainability is multidimensional

Numerous aspects must be covered

Going even beyond:
Green Care Professional

is considered by the following certification:

Formulation	
Material health	
Circularity of raw materials	
Biodiversity	
Degradability of raw materials	
VOC / Indoor air quality	

Surfactants produced from European sources

Packaging	
Recyclate share	
Recyclate origin	
Recyclability	

Post-Consumer Recyclate from the Yellow Bag in bottles and caps

Production & Supply Chain	
Energy	
Emissions	
Value chain	
Social fairness & Ethics	
Water & Soil	

In-house water treatment and production of electricity using wind and solar power

You'll find more information about the individual sustainability labels on our website

www.green-care-professional.com in the "About the Brand" drop-down menu under "Certifications".

Which system satisfies your requirements?

Ready4U

Speed

Our spray bottles for safe and fast application without measuring.

Concentrate + Dosing

Price / performance ratio

High-performance concentrate and simple dosing options.

Switch

Reduce + Reuse + Recycle

Ultra-concentrated formulations in bottle with dosing cap and refill pouch.

Kliks

Safety

Our compact Kliks cleaning system is intuitive and safe.

QUICK & EASY

Mobility

Precise dosing, suitable for mobile use, clever packaging design.

Commitment leads to Change

Acting out of conviction

„Together we are strong“ – if we pursue our goals as one, we achieve more. That's why we work in many instances with initiatives, companies and cooperation partners who

pursue the same goals as ours. We all want to protect our environment, promote sustainable production and advance the circular economy in society.

Our Success: The Recyclat Initiative

Microplastic in the oceans is a devastating consequence of the way we handle the flood of waste. The United Nations Environment Programme, the World Economic Forum and international bodies like the Ellen MacArthur Foundation see the solution to the problem in a closed circular economy for plastic. We do too! The Recyclat Initiative is an important step toward this goal.

Our Success: World record

More than 1 billion PET bottles made of recyclat have been put into circulation by the Werner & Mertz Group. (January 2026)

wir-fuer-recyclat.de

Green Key

Green Key: The Key to Sustainable Accommodations

Hotels, youth hostels, campgrounds and all other types of accommodation require an enormous amount of electricity, water and cleaning products to handle the high number of guests. A minor change in the direction to sustainability can have many positive effects.

Green Key International certifies accommodations that use sustainable business practices. We provide Green Key with our practical Performance Calculator so organization can convince even more companies to think and act sustainably.

Working Together for Sustainability: Our customer success stories

While others only talk about sustainability, we have consistently put it into practice with our customers. With our ecological and recyclable cleaning

solutions, we have already eliminated several tons of plastic, crude oil and CO2 emissions. You too can become a sustainability role model!

Ghent: shines in heroic splendor!

In recent years Ghent, the second largest city in Flanders, has worked steadily to make its municipal cleaning services sustainable and that includes the use of integrally sustainable cleaning products. Ghent purchases products that satisfy the EU Ecolabel criteria and was the first city to introduce "Cradle to Cradle®" certified products for the cleaning of its buildings and facilities.

Mont-Saint-Michel: Preserve the UNESCO World Heritage Site!

The two Groupe Gaulois hotels clean with Green Care Professional, making them sustainability role models. It sees the use of our eco-certified cleaning products as added value, which can be effectively communicated to the target groups.

You can find more success stories on our Green Care Professional website.

Bocuse d'Or

Bocuse d'Or: Culinary Arts meets Social Commitment

Green Care Professional is in the chefs' corner during culinary competitions, working to ensure flawless kitchen hygiene.

Green Care Professional is not just a partner at the Bocuse d'Or grand finale but also the presenter of the Social Commitment Award bestowed at the event. An international jury honors one of the competing teams of chefs for its social engagement and thereby supports outstanding projects in food aid or sustainable development.

Our Award-winning Engagement

German Environmental Award

„Bold decisions today will trigger positive interactions for tomorrow.“

With these words, German Federal President Frank-Walter Steinmeier presented the German Environmental Award 2019 to our CEO Reinhard Schneider. The jury was particularly impressed by Schneider's commitment to the Recyclate Initiative and his consistent focus on the topic of sustainable management in all parts of the company.

Extensive Service

Based on unique expertise

Our passion for cleanliness and our decades of experience in the cleaning industry make us the perfect contact for all your issues. With

us you benefit from efficient and innovative products and a complete service portfolio too. Here is an overview of our main services:

Our Service Portfolio: For your satisfaction and efficiency

1

Top advice

Our qualified advisors closely examine your cleaning services and help you to optimize them.

2

Customized concepts

When you need recommendations or cleaning or plans, we use our expertise to optimize your offers and solve your application problems.

3

Technical Support

We would be pleased to give you information about our services or concrete details on our separate services: info@tana.de

4

Special Know-how

We bring you and/or your employees up to date in the cleaning industry with our training programmes.

5

Competitive Advantage

Sustainability is becoming more important for society and businesses. Only those companies that can credibly convey their sustainability efforts will realize a competitive advantage. We'll help you to do just that!

- Performance Calculator to figure out potential improvement to your ecological footprint
- Certificate that proves your resource conservation with our products

Optimize Ecological Performance

Measure your sustainability progress with the Performance Calculator

Companies are paying more attention to their ecological footprint these days. Our Performance Calculator shows you how you can optimize your footprint with Green Care Professional.

Your added value with Green Care Professional.

Less carbon dioxide

Less plastic

Less crude oil

Benefits for every area of application

Our Performance Calculator reports the potential reduction in your environmental impact in every application area. Use the results in bids, offers and as credible, positive PR for sustainability reports.

Our Sustainability Promise:

“We confirm that the savings in crude oil and carbon emissions determined by the Performance Calculator were correctly calculated for both the packaging components and the detergent formulations of all Green Care Professional products.”

Building Care

Daily Cleaning and Care

Maintenance Cleaners

10

TANET uniSwitch

Ultra-concentrated floor and surface cleaner

Exact dosing | Safe application | Reduce, Reuse, Recycle

High-performance alcohol-based cleaner for floors and surfaces. With optimal wetting properties for easy and thorough removal of all types of dirt without leaving streaks, even on porous stone floors and hydrophobic surfaces such as PUR. Ideal for all water-resistant floor coverings, e.g. made of plastic, stone, rubber, linoleum, PVC, etc. Ultra-concentrated and EU Ecolabel certified formula.

716155 - 1 L BOTTLE* | 716230 - 1 L POUCH**

Dosage: 5 ml/l

9

TANET SR 15

High performance floor- and surface cleaner

Perfect cleaning results | Good wetting properties | Cost-efficient

High-performance floor and surface cleaner based on alcohol. Ideal maintenance cleaner with outstanding environmental characteristics for the effective cleaning of all water-resistant floorings, e.g., stone, rubber, linoleum, PVC and all washable, smooth and shiny surfaces of plastic, lacquer, glass, ceramics, metal, etc.

712479 - 1 l BOTTLE | 712480 - 5 l CANISTER

Dosage: 2,5 - 25 ml/l

9

TANET SR 15 zero%

High performance floor and surface cleaner

No perfume and dye | Perfect cleaning results | Good wetting properties

High-performance floor and surface cleaner based on alcohol. Ideal maintenance cleaner with outstanding environmental characteristics for the effective cleaning of all water-resistant floorings, e.g., stone, rubber, linoleum, PVC and all washable, smooth and shiny surfaces of plastic, lacquer, glass, ceramics, metal, etc. The formulation without perfume and dye ensures greater tolerance for allergy sufferers without sacrificing cleaning performance.

717141 - 1 l BOTTLE

Dosage: 2,5 - 25 ml/l

TANET karacho zero%

Surfactant-free all-purpose cleaner

Universal applicability | User safety | Cost-efficient

Powerful surfactant-free all-purpose cleaner for manual and mechanical cleaning of all water-resistant surfaces and floors, including stone, especially microporous stone flooring. Also suitable for cleaning textiles, walls and ceilings. The formulation without perfume and dye ensures greater tolerance for allergy sufferers without sacrificing cleaning performance.

717223 - 1 | BOTTLE | 717221 - 5 | CANISTER

Dosage: 2,5 - 200 ml/l

TANET neutral

Neutral cleaner

Top cleaning performance | Degreasing power | Material and skin friendly

Neutral cleaner with optimum cleaning power to remove oily and greasy soiling. Works at economically low concentrations; very good material and skin compatibility. Can be used as hand dishwashing detergent. Pleasant scent.

712555 - 1 | BOTTLE | 712506 - 5 | CANISTER

Dosage: 2,5 - 7,5 ml/l

TANET orange

Floor and surface cleaner

All-purpose use | Increased user-safety | Pleasant orange scent

Ecological, general use floor and surface cleaner. Leaves behind a lingering, pleasant scent of oranges. Very good dirt-holding capacity; with high material compatibility.

712477 - 1 | BOTTLE | 712478 - 5 | CANISTER

Dosage: 2,5 - 7,5 ml/l

TANET dayKliks

High-concentrated floor and surface cleaner

Economical | High wetting properties | Safe use

Innovative formula with exclusive surfactant combination with exceptional wetting, dispersing and cleaning properties. Perfect cleaning results for floors, surfaces and glass. Leaves behind the refreshing scent of grapefruit. Kliks is a closed dosing system with sustainable packaging and high-performance products. Plastic packaging too is significantly reduced (up to 90%).

715259 - 2 | POUCH

Dosage: 2 - 6 ml/l

TANET SR 13

Alcohol cleaner

Good cleaning performance | Streak-free | Pleasant scent

Alcohol cleaner with a uniquely fresh scent. High cleaning performance combined with gentle treatment of materials. Delivers perfect shine retention without streaks and residue. Dries quickly.

716165 - 40 ml SACHET** | 716089 - 1 | BOTTLE* | 716090 - 5 | CANISTER*

Dosage: 2,5 - 20 ml/l

Glass Cleaners

GLASS cleaner

Glass & window cleaner

Powerful | Increased user safety | Cost efficient

pH neutral, ecological glass cleaner, particularly effective at removing all environment-related dirt deposits, greasy residue and nicotine stains. Cleans without leaving streaks and smears behind. Ready to use, based on ethanol.

Dosage: Ready to use

712494 – 750 ml SPRAY BOTTLE | 712468 – 1 l BOTTLE | 712469 – 5 l CANISTER

100% bio based, CLP FREE, Ecolabel DE/020/384, full scope, Cradle to Cradle

GLASS classic

Glass & interior cleaner

Streak free | Easy application | Cost efficient

Perfectly cleans and degreases smooth surfaces. It preserves glossy materials and dries quickly without leaving traces. GLASS classic has a versatile use and is very cost efficient.

Dosage: Ready to use

712969 – 750 ml SPRAY BOTTLE | 712693 – 5 l CANISTER

100% bio based, CLP FREE, Ecolabel DE/020/384

Maintenance Cleaners in Quick & Easy system, Ready-to-use Cleaners

TANET interior Quick & Easy

Universal surface cleaner

High performance | Streak-free | Versatile

Part of the Quick & Easy portable dosing system. Stands for efficient use at low operating costs. Contains no CLP-classified hazardous substances. Stable, compact foam. Dries quickly without leaving behind streaks and smears. Can be used for window cleaning too. High material compatibility. Pleasant scent.

Dosage: Ready to use

713658 – 325 ml CARTRIDGE

100% bio based, Ecolabel AT/020/012, full scope, Cradle to Cradle

TANET interior zero% Quick & Easy

Universal surface cleaner

No perfume and dye | High performance | Streak-free

Part of the Quick & Easy portable dosing system. Stands for efficient use at low operating costs. Contains no CLP-classified hazardous substances. Stable, compact foam. Dries quickly without leaving behind streaks and smears. Can be used for window cleaning too. High material compatibility. The formulation without perfume and dye ensures greater tolerance for allergy sufferers without sacrificing cleaning performance.

Dosage: Ready to use

717145 – 325 ml CARTRIDGE

NO PERFUME, NO DYE, 100% bio based, Ecolabel AT/020/012, full scope, Cradle to Cradle

TANET multiclean

Ready-to-use all-purpose cleaner

Quick-drying | Long-lasting scent | Anti-static

Guarantees material-friendly cleaning without streaks or residue and maintains the surface's original shine. Removes finger prints, nicotine residues, grease and ink spots, pen and felt-tip lines. Intensive long-lasting pleasant scent.

715779 – 750 ml SPRAY BOTTLE

Dosage: Ready to use

TANET karacho spray zero%

Surfactant-free all-purpose cleaner

No perfume and dye | Increased user-safety | Ready-to-use

Powerful surfactant-free all purpose cleaner for all waterproof surfaces and floors like stone, especially micro-porous-stones. Also suitable for cleaning textile surfaces, wall and ceiling. The spray bottle allows quick, easy and targeted application. The formulation without perfume and dye ensures greater tolerance for allergy sufferers without sacrificing cleaning performance.

717226 – 750 ml SPRAY BOTTLE

Dosage: Ready to use

Biotechnological Cleaners

BIOBACT power

Powerful biotechnological all-purpose cleaner

Powerful cleaning | Long-lasting cleanliness | Odor elimination

Alkaline cleaner with biotechnological odor elimination for all waterproof surfaces and floors. Long-lasting elimination of offensive odors; leaves behind a pleasant scent. Regular use prevents new formation of organic contaminants. BIOBACT power helps to reduce offensive smells in industrial operations, especially in areas who watery solutions are disposed of via the wastewater system.

716825 – 1 l BOTTLE

Dosage: 2,5 - 250 ml/l

BIOBACT clean

Biotechnological all-purpose cleaner

Cleaning efficiency | Long-lasting cleanliness | Odor elimination

Long-lasting elimination of offensive odors; leaves behind a pleasant scent. Regular use prevents new formation of organic contaminants. BIOBACT clean helps to reduce offensive smells in industrial operations, especially in areas who watery solutions are disposed of via the wastewater system.

716817 – 1 l BOTTLE

Dosage: 10 - 200 ml/l

BIOBACT scent

Biotechnological odour eliminator

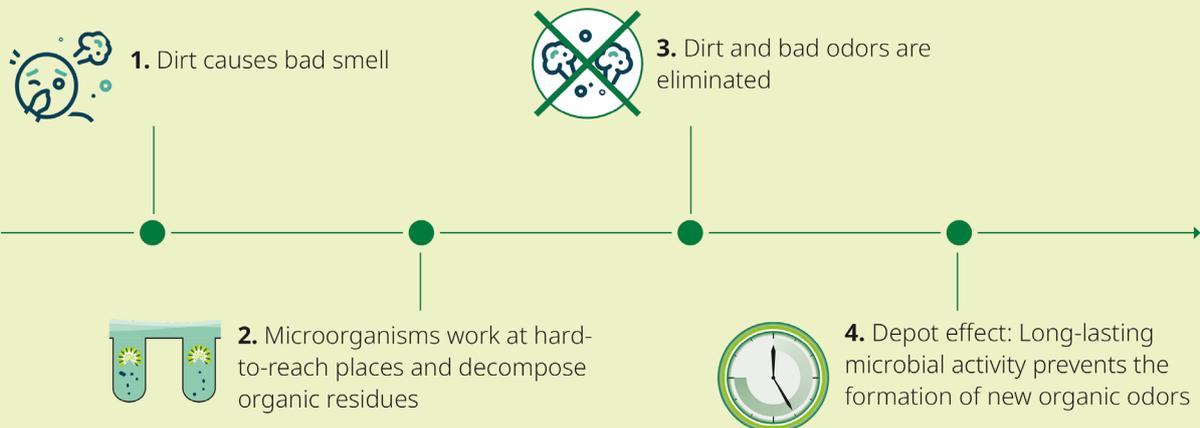

Effective odor control | Long-lasting cleanliness | Material friendly

For all waterproof surfaces and fabrics. Long-lasting elimination of offensive odors; leaves behind a pleasant scent. Varied uses in sanitary facilities, drains, trash containers and the like. No hazard labels required.

716814 – 500 ml SPRAY BOTTLE | 716813 – 1 l BOTTLE

Dosage: 200 ml/l - undiluted

How biotechnological cleaning & odor elimination works

Care & Maintenance

TAWIP neo

Wipe care based on biopolymers

Care and Cleaning | Water soluble biopolymers | DIN 13082-2 certified

Floor cleaner and care product with watersoluble plant-based biopolymers. Leaves behind an even, silky-gloss finish with anti-static effect and DIN 18032-2 certified slip-resistance. Excellent for mechanical and manual maintenance cleaning of all waterproof floor coverings. EU-Ecolabel certified formulation.

717137 – 1 | BOTTLE | 717146 – 5 | CANISTER

Dosage: 2,5 - 300 ml/l

TAWIP vioSwitch

Ultra-concentrated floor cleaner and care

Exact dosing | Safe application | Reduce, Reuse, Recycle

Nourishing floor cleaner with natural coconut oil soap to protect the coverings against leaching effects. Creates a silky-glossy, polishable care film with an antistatic effect and tested slip resistance in accordance with DIN 18032-2. Excellent for mechanical and manual maintenance cleaning of all waterproof floor coverings. Ultra-concentrated and EU Ecolabel certified formula.

716156 – 1 | BOTTLE* | 716232 – 1 | POUCH**

Dosage: 5 ml/l

TAWIP vioclean

Floor cleaner & care

Natural soap basis | High slip resistance | Cost-efficient

Soap-based floor cleaner and care product with exceptional environmental properties. For use with automatic floor scrubbers or for manual application. With natural coconut oil soap to protect floors from leaching effects. Tested slip resistance in compliance with DIN 18032-2. Effective even in low concentrations.

712484 – 1 | BOTTLE | 712485 – 5 | CANISTER

Dosage: 2,5 - 300 ml/l

TAWIP vioclean zero%

Floor cleaner & care

Natural soap basis | User safety | No perfume and dye

Soap-based floor cleaner and care product with exceptional environmental properties. For use with automatic floor scrubbers or for manual application. With natural coconut oil soap to protect floors from leaching effects. Tested slip resistance in compliance with DIN 18032-2. Effective even in low concentrations. The formulation without perfume and dye ensures greater tolerance for allergy sufferers without sacrificing cleaning performance.

717139 – 1 | BOTTLE

Dosage: 2,5 - 300 ml/l

Emulsions

LONGLIFE complete

Ultra-performance floor polish

Completely economical | Completely safe | Completely flexible

High-performance dispersion system with outstanding features. Extremely resistant and durable, thanks to specially developed combination of high-performance polymers. Highly resistant to alcohol and disinfectants. Environmentally compatible formula awarded the Austrian environmental seal. User-friendly; works best in system with LINAX complete. Tested slip resistance in compliance with DIN 18032-2.

712513 – 5 l CANISTER

Dosage: 200 ml/l - concentrated

LONGLIFE matt

High-performance matt floor polish

Resistant | Matt appearance | Increased safety

Provides alcohol and surface disinfectant resistance with a matte look for ideal floor care in healthcare facilities. Resilient, highly elastic protective film that adheres well to all types of flooring, including damp linoleum. Slip resistance tested against DIN 18032-2 criteria. Certified with Austrian environmental seal.

714289 – 5 l CANISTER

Dosage: 200 ml/l - concentrated

LONGLIFE polish

High-gloss floor polish

All-purpose | Safe use | Cost-efficient

Universal use of floor care dispersion without eco-toxic ingredients such as metal salt (zinc), TBEP, fluorosurfactants and fragrances. Adheres well to surfaces, polishes and restores protective film. LONGLIFE polish is a safe and durable floor polish. Tested slip resistance as per DIN 18032-2. Works best in the system with LINAX stripper. Certified with Austrian environmental seal.

712514 – 5 l CANISTER

Dosage: 200 ml/l - concentrated

LONGLIFE hospital

Disinfectant-resistant emulsion polish

Disinfectant-resistant | Long-lasting | Easy to apply

Dispersion with good resistance to alcohol disinfectants. Can be applied easily and quickly. Good leveling and low dirt absorption. Suitable for use on all waterproof floor coverings. Ideal for hospitals, healthcare facilities or nursing homes and wherever APESIN is used for cleaning. Certified with Austrian environmental seal.

716038 – 5 l CANISTER

Dosage: 200 ml/l - concentrated

LONGLIFE diamond

Long-lasting, high gloss emulsion polish

Good wear resistance | High gloss | Easy use

Lays down a very glossy, smear-resistant and anti-slip protective film with excellent resistance to heel marks, tracks and soiling. Outstanding flow. High leveling capacity on absorbent flooring coverings. Especially economical; very little product is needed for one application.

716060 – 5 l CANISTER

Dosage: 200 ml/l - concentrated

LONGLIFE stone

Long-lasting, high gloss emulsion polish

Slip-resistant | High wearing | For natural and artificial stone

The contained powerful care components guarantee best slip resistance even under strong traffic. Thanks to the high resistance of the time and cost saving formulation, the stone floor is protected against heavy soiling and heel marks. Free of dangerous ingredients such as zinc, TBEP, perfume, and fluorinated levelling.

716062 – 5 l CANISTER

Dosage: 200 ml/l - concentrated

Floor strippers

LINAX complete

Ultra-performance floor stripper

Extremely powerful | Fast-acting | No rinsing

Removes all types of polymer films. Ideally used in the system with LONGLIFE complete. Effectively removes stubborn floor polish films, including on over-treated floors. Can also be used on alkali-sensitive floors. Saves time and resources because rinsing and neutralizing are not required. Certified with Austrian environmental seal.

712655 – 5 l CANISTER

Dosage: 30 - 250 ml/l

LINAX stripper

Universal floor stripper

All-purpose | Safe use | Cost-efficient

Universal cleaner with exceptional environmental characteristics. Safe use, suitable on all alkali-sensitive floor coverings. Ideal when used in system with LONGLIFE polish; easily removes multiple layers of LONGLIFE polish polymer coatings. LINAX stripper works without eco-toxic ingredients (phosphates, EDTA, NATA, fragrances, dyes). Certified with Austrian environmental seal.

712515 – 5 l CANISTER

Dosage: 50 - 200 ml/l

All-purpose and Deep Cleaners

9

TANEX allround

4 in 1 power cleaner

Versatile | Excellent wetting properties | Powerful

High-wetting and slightly alkaline all-purpose deep cleaner for cleaning all waterproof floors and surfaces. The reliable 4-in-1 multi-talent works on heavily soiled surfaces as a maintenance or deep cleaner, final cleaner prior to hand-over or top stripper. Suitable for use with floor scrubbers.

713327 – 1 l BOTTLE | 713328 – 5 l CANISTER

Dosage: 2,5 - 20 ml/l

Deep Cleaners in Ready-to-use

11

TANEX power

Ready-to-use power and plastic cleaner

Powerful | Efficient & economical | Varied uses

Ready-to-use power cleaner for synthetic surfaces with an excellent stain remover for many types of stubborn stains such as ink from inkpads or ballpoint pens and text markers, fingerprints, nicotine and cosmetics. Highly efficient, quick use.

715930 – 750 ml SPRAY BOTTLE | 715931 – 5 l CANISTER

Dosage: Ready to use

Deep Cleaners in Quick & Easy system

10

TANEX performa Quick&Easy

Power cleaner

Powerful | Low residue | Economical

Part of the Quick & Easy portable dosing system. Combines outstanding performance with minimum effort and low usage costs. With no CLP-classified hazardous ingredients, the product ensures maximum user safety. Works quickly to remove stubborn stains of many different types. Low residue formation. Maintains the original appearance of the surface. Leaves behind a pleasant scent.

Pre-wash spotter for protein and greasy stains

Easy-to-use | For all fabrics | Without bleaching agents

Effortlessly removes greasy, proteinaceous soiling. Without bleaching additives or optical brighteners. The product is therefore suitable for all fabrics, including delicate washables and colored laundry. The formula is based on renewable raw materials.

713068 – 750 ML SPRAY BOTTLE

Dosage: Ready to use

SOLUS oxydet

Active-oxygen pre-spotter for colored stains

Easy-to-use | Chlorine-free | Efficient stain remover

The active ingredient combination of SOLUS oxydet from biodegradable surfactants and hydrogen allows effective removal of colored stains. SOLUS oxydet contains neither chlorine bleach nor optical brighteners and is also suitable for use on sensitive or colored textiles.

715970 – 750 ML SPRAY BOTTLE

Dosage: Ready to use

Fabric Softeners

SOFT fresh CF protect

Fabric softener with anti-pilling effect and color protection

European plant-based surfactants | Re-new effect | Revitalisation of color

Fabric softener with fiber care and color protection. Makes the linen silky and soft. SOFT fresh CF protect with Re-new effect offers high fibre care and revitalization of the color for natural fibres and extends the life span of the fibres. Contents surfactants from rapeseed and sunflower oil mainly from European cultivation.

716885 – 5 L CANISTER | 716886 – 15 L CANISTER

Dosage: 5 - 15 ml/kg
see dosing table

SOFT nature

Hypoallergenic last rinse fabric softener

100% European plant-based surfactants | No dyes or preservatives

Fabric softener based on 100% regenerative vegetable raw materials; contains no dyes or preservatives. Leaves laundry velvety soft with a naturally fresh scent. Makes ironing fast and easy.

713163 – 5 L CANISTER

Dosage: 5 - 15 ml/kg
see dosing table

SOFT bloomKliks

Ultra-concentrated liquid fabric softener

Economical | Pleasant scent | For all water types

Based on vegetable raw materials. With its natural triple action, the fabric conditioner combines a flowery scent with fabric softness and makes ironing easier. For use in the Kliks System.

714350 – 10 L BAG IN BOX

Dosage: 2 - 6 ml/kg
