

Professional Cleaning in Theory and Practice

Live Training

Web Seminars

E-Learning

Trainings with impact.

Mastering the job like a professional.

In the Green Care Academy we present our support services with training offerings. In three areas we instruct your employees with the objective of working safely and efficiently. Your employees remain qualified, motivated and up-to-date at all times.

Choose the right topics to satisfy your requirements from among our extensive offers. Our employees with years of practical experience and external speakers or trainers with varied specialties are available to you for your training purposes.

Live Training with personal service

In our live training you will be personally looked after by Tana-Chemie employees who have years of practical experience. We offer half and full day seminars on a variety of currently relevant subjects. Make your selection from our broad range of practical workshops:

- Sanitary Facilities
- Commercial Kitchens
- Building Care
- Occupational Safety and Hazardous Materials
- Prevent damage, solve problems
- Bidding Process, Costing and Order Processing
- and much more

Online reservations can be made at:
www.green-care-academy.com/Live-Schulung

Company-specific seminars can be conducted on your premises. Please contact us for a custom-designed seminar:
Live-Schulung@green-care-professional.com

Web Seminars Location-independent training with trainer

In our Green Care Academy Web Seminars your employees can take part in location-independent courses. You need only a PC or tablet with a speaker. Over the chat function you can submit questions to the speaker and actively participate in the seminar.

Choose from our varied topics in compulsory training and continuing education:

- Technical Rules for Biological Agents TRBA 250
- Protection against Infection Act (IfSG) §§ 42 and 43 for medical and nursing personnel
- IfSG §§ 42 and 43 for Food-handlers
- Property damage in building care
- Company-specific Web Seminars upon request
- and much more

E-Learning Our training platform: flexible, practical, understandable

Our E-Learning platform offers you all the advantages of a flexible digital learning system.

content, which they can call up many times, and then check their knowledge by answering some questions. Videos of practical work make the material easy to understand.

With this platform available at any time and anywhere, your employees can learn the course material without classroom training. Users have access to all

Our training platform is available to you in German and English. Other languages upon request.

More information at:
www.green-care-academy.com/E-Learning

Or make personal contact with us at:
E-Learning@green-care-professional.com

Read more about our new E-Learning platform on the following pages.

E-Learning: Perfectly prepared for everyday cleaning jobs.

1. Compulsory Instruction

We create for you the basis for legal certainty before the first day of work by enabling your employees to complete all relevant compulsory training on our time- and location-independent platform. All compulsory instruction was developed jointly by the trade association, our Green Care Academy trainers and application technicians.

We provide the following compulsory instruction in eight courses:

Electrical Appliances

Personal Protective Equipment

Safety in the premises

Hygiene training course IFSG

Hazardous substances

TRBA 250 Hygiene training course

Hand Hygiene

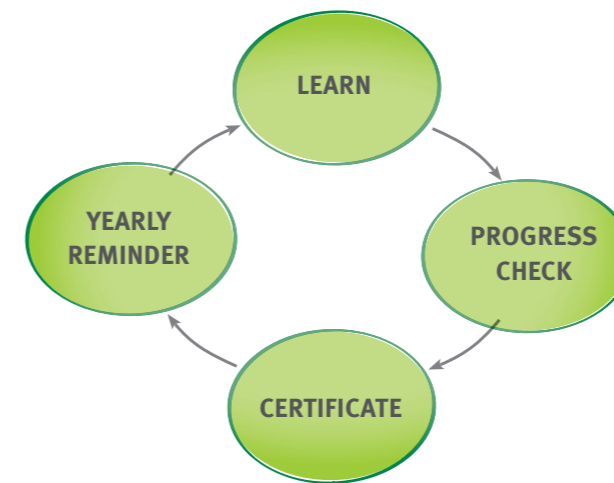

Ladders and steps

2. Documentation and Progress Checks

The compulsory training content is conveyed by video with voice-over explanations and easy-to-understand graphics instead of copious amounts of text. The employee's level of knowledge is checked with a series of questions. Personalized certificates document successful completion of each course for your employees. With annually recurring compulsory instruction, your employees retain their knowledge and stay up-to-date. That ensures on-the-job safety for your staff. We also send you automated reports about the training status of your employees via e-mail. You specify the reporting intervals. If you like, we can set up an interface with your personnel management system.

Taking courses ensures learning success.

Simple explanatory voice-overs and easily understood graphics instead of a lot of text.

3. Further Training and Practical Knowledge

In 18 courses we train your employees in the efficient and sustainable cleaning of different areas. Your personnel learn about the right equipment, suitable products, required dosages and the correct order and execution of work steps for each space to be cleaned.

Cleaning a Hotel Room

Cleaning a Kitchen

Cleaning a Hospital Bathroom

Which level is right for your training needs?

Level 1: Basic Version

Three compulsory instruction units and training for one area of application:

Hazardous substances

Personal Protective Equipment

Hand Hygiene

Cleaning a bathroom/toilet

The complete overview of all courses offered in Level 2.

Level 2: Full Version

Top Training Quality

- for the smallest objects to large corporations
- All eight compulsory instruction units
- 18 videos with in-depth industry know-how for cleaning specialists and training for different areas of application

Minimum Administrative Work

- Regular reports on training status
- Certificate as proof of training
- Yearly reminders about compulsory instruction
- No laborious scheduling coordination for training
- If requested, content can be limited for different user groups

Cost-efficient

- Lower training costs
- Fair billing, thanks to individually assigned access codes
- More knowledge per level – With the selected level, you define the scope to satisfy your needs

ALL 26 COURSES

Our training platform is available to you in German and English.

French, Spanish, Italian, Russian, and Turkish follow soon. Other languages available upon request.

Level 3: Individual Version

We offer you your own customized E-Learning platform. Instruct your employees in matters relevant to you!

On your own Internet site you can use all the E-Learning content offered in Level 2 and add your own training material to it. You'll receive administrator access to all areas of the E-Learning platform and, upon request, an interface to your personnel management system via an API query.

Your own logo

Manage which courses your employees can see.

Communicate your news quickly to all employees

Customized banner

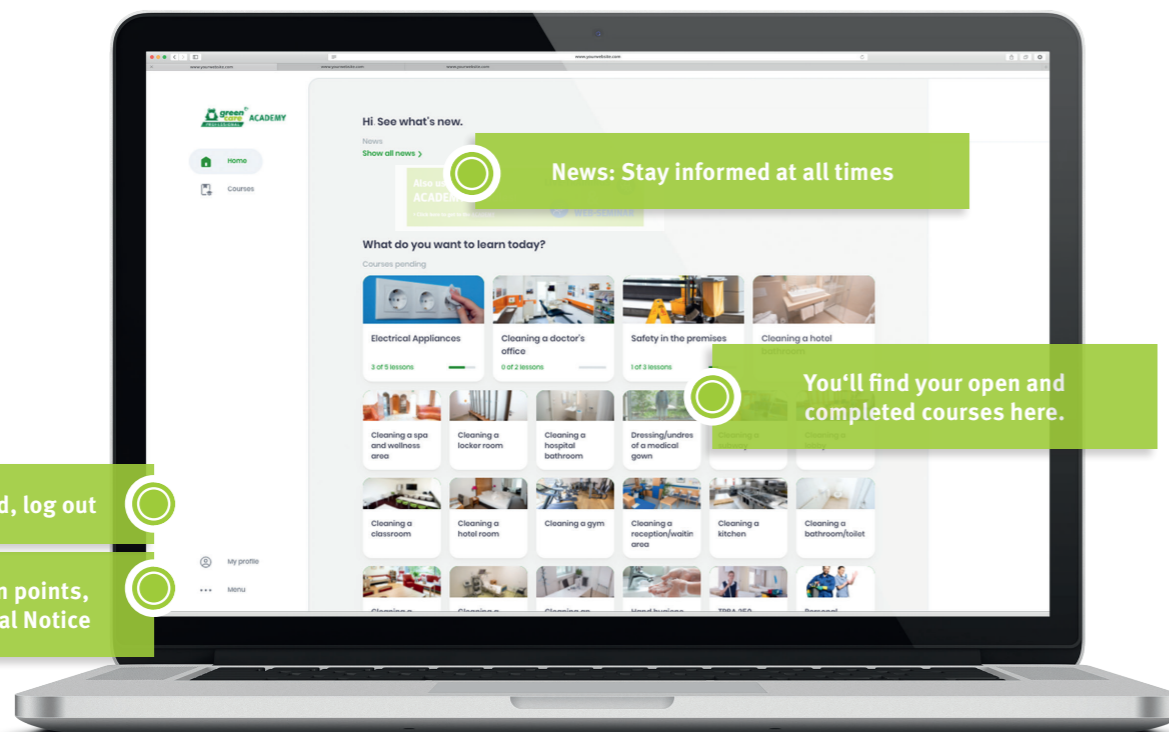

Upload additional courses with your own content.

You can analyze training progress, number of retrievals and proof of compulsory instruction in your own Admin area. You manage employee administration – if desired, with an API interface too.

On the platform – Learn with a click

1 Quick log-in after registration

2 Home page
All courses at a glance

Change password, log out
Other navigation points, Contact and Legal Notice

3 Content presented in video

4 Progress check for compulsory instruction

5 Certificate

Your way to E-Learning:
