

Detergents for robots

Cleaning robots make work easier. Even in times of skilled labor shortages, regular cleaning and hygiene standards remain guaranteed. In principle, a cleaning robot is an autonomously driving scrubber-dryer. Therefore, detergents for robots must have comparable properties to ensure a smooth workflow.

The advantages of detergents for robots

- Low-foam or foam-free streak-free cleaning
- Powerful, so that everything gets clean even with fast-moving robots
- Material-friendly for the robot (hoses, water tank)
- Wide range of materials suitable for a large number of different floors

Special product

BIOBACT power

Powerful biotechnological all-purpose cleaner

716825

1 l

BIOBACT power works with 100% natural microorganisms. These little helpers can reach even hard-to-reach places, remain there, and feed on newly introduced dirt. With regular use, they reduce the build-up of biofilm and keep the robot clean. This achieves a fresh cleaning result without unpleasant odors.

Detergents for robots

Maintenance cleaners
