

BIOBACT power

Powerful biotechnological
all-purpose cleaner

Invisible helpers: Cleaning
and odor elimination

Time saving with microorganisms

For those who don't want to start from scratch every day, BIOBACT power offers 100% natural microorganisms to make your job easier. These little helpers reach even hard-to-reach places, stay there, and feed on newly introduced dirt. With regular use, the biological degradation process creates a long-lasting, clean, fresh indoor climate free of unpleasant odors.

BIOBACT power

716825 – BIOBACT power 10 x 1 l Bottle

Weitere BIOBACT Produkte

716814 – BIOBACT scent 8 x 500 ml Spray bottle

716813 – BIOBACT scent 10 x 1 l Bottle

716817 – BIOBACT clean 10 x 1 l Bottle

Benefits for the environment

- + Low dosage
- + 82 % bio-based carbon
- + Plant based surfactants
- + **Value retention:** Microorganisms reduce mechanical impact, thereby extending the lifespan of surface materials.

Less efforts thanks to natural microorganisms.

Benefits for business

- + **Time saving**
 - Cleaning and odor removal in one step
 - Longer cleaning intervals
- + **Extra Power & Depot effect**
 - High performance cleaner with 100 % natural microorganisms
 - Long-lasting dirt und odor elimination
- + **Safe**
 - CLP free
- + **Versatile areas of application**

The BIOBACT Range

Strong against odors

BIOBACT products combat the causes of unpleasant odours in a wide range of applications

Why do unpleasant odours occur?

They occur where organic residues are not completely removed – even if surfaces appear clean.

Common causes

- Organic residues, such as food scraps, bodily fluids and bacteria on floors and surfaces
- Hair, dirt or animal excrement
- Contamination and deposits in toilets and urinals
- Contents of waste containers and bins
- Sweat, skin oils and flakes on seat cushions, handles or handrails
- Contaminants in ventilation and sewage systems

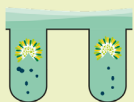

How biotechnological cleaning & odor elimination works

1. Dirt causes bad smell

3. Dirt and bad odors are eliminated

2. Microorganisms work at hard-to-reach places and decompose organic residues

4. Depot effect: Long-lasting microbial activity prevents the formation of new organic odors
